

BRIGHT GREEN ISLAND

...a sustainable society

www.brightgreenisland.com

Bright Green Island Laboratory for a sustainable society.

Values
Healthy
life style.
Clean
environment.

Technology
Instruments to
build a sustainable
future.

Knowledge
Curiosity, research,
new ways to develop
our experiences.

Economy
Energy efficiency.
Reducing costs.
Implementing
renewable
production.

People
Business with
eco-sustainable
principles.

A sustainable society in continuous evolution...

Vision and imagination have no boundaries...
a full scale laboratory transforming bright ideas
into our future sustainable society.

Sustainable evolution
Being part of the ever changing development creating our
sustainable future with bright green, smart solutions within
wastetechnology, transport solutions, energy efficiency,
microgrids, electric driven cars, second generation ethanol
production, biogas...

Time for being bright
District heating produced with biomass and waste.
Decentralized electricity generation facilities like
Wind turbines, Biomass and Biogas. Microgrid
demonstration site

Favouring research
Private companies together with knowledge
institutions and research facilities in a
growth forum driving our future towards a
sustainable society.

Facing the challenge
Skilled people, researchers, engineers
transforming bright ideas into sustainable
solutions for our common future.
